

STRATO POLISH GOLD AND STRATO POLISH SILVER

Non-Cyanide Electropolishing Solutions

The conventional method for polishing gold, gold alloys and silver alloys required the use of cyanide, a highly poisonous substance, as the primary agent for electropolishing.

However, STRATO UNIC have succeeded in developing Strato Polish GOLD & Strato Polish SILVER, revolutionary electropolishing solutions. The new solutions, which do not contain cyanide at all, are non-poisonous treatment that will increase the safety and efficiency of the electropolishing process.

Strato Polish GOLD & Strato Polish SILVER are ideal for creating a uniform gloss finish on complex-shaped cast, pressed and necklace products.

A complete line of electrolytic polishing equipment has been created to bring-out the full potential of Strato Polish GOLD & Strato Polish SILVER. Special attention has been given to the safety of the equipment.
